**2. Water Quality - Potential Points 120**

**A. Surface Water Pollutants - 40 Points**

There is a probability that irrigation water containing salt, pesticides, and/or nutrients (or other associated chemicals) is leaching into the ground water. Treatment is needed to prevent these pollutants from contaminating ground water, through leaching.

Distance of Surface Run-Off to Live Water	Points	Before	After
<100 Ft.	40		
101 - 500 Ft.	30		
501 - 1,320 Ft.	20		
1,320 - 2,640 Ft.	10		
>2,640 Ft.	5		
No Runoff	0		
<b>2. A. Surface Water</b>		<b>Total</b>	

**B. Ground Water Pollutants - 80 Points**

There is a probability that irrigation water containing salt, pesticides, and/or nutrients (or other associated chemicals) is leaching into the ground water. Treatment is needed to prevent these pollutants from contaminating ground water, through leaching and direct return flow into wells. Points to be awarded based on depth of well.

Depth to Water Table	Points	Before	After
1 - 10 Ft <b>or</b> elimination of any direct discharge into ground water.	80		
10 - 50 Ft.	60		
50 -100 Ft.	40		
>100 Ft.	20

**3. Selected Conservation Practice(s) - Potential Points 265**

Practices used in this section of the ranking criteria, and intended to be included in the conservation plan of operations, must be cost shared. Higher priority (value) is given to those practices which address multiple resource concerns, are cost effective, and have longer life spans. Practices in this section are grouped, one or all practices may be used.	Potential Points	Percent of Need - To be Installed	Points

**4. Other Considerations - Potential Points 75**

Below are some suggested, not required, criteria. If there are other criteria the D.C. wants to recommend based on LWG advice, please include them here.	Potential Points		After Points
A. Threatened and Endangered species are in the area and the contract will enhance habitat for the species.	15		
B. Treatment of this land could have a beneficial impact on a 303d listed stream segment.	20		
C. Treatment of this land enhances the benefits of an active sec. 319 project or the land is located within a proposed sec. 319 project area.	10		
D. Riparian areas will be enhanced in the contracted area.	10		
E. Eradicate/prevent infestation of Class A and/or B noxious weeds as designated by NMDA.	10		
F. This land unit is within a NMED designated Category I Watershed.	10
